

Zynik II Capabilities

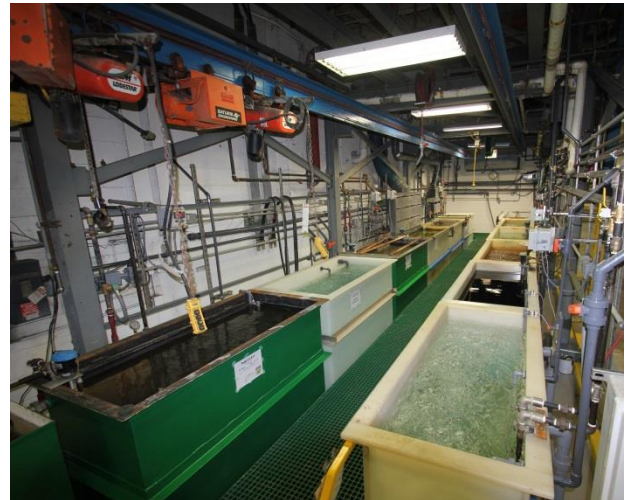

ANOPLATE

Our Solutions make your products better

Zinc-Nickel Alloy Deposit, Low Hydrogen Embrittlement (LHE)

Zynik II Line Features

- ✧ Hoist Capability up to 1 Ton
- ✧ In-line ability to plate:
 - Alloy Steel
 - Hardened Steel
 - Stainless Steel
- ✧ Off-line adjacent ability to plate:
 - Tungsten
 - Aluminum
 - Copper/ Brass
- ✧ From → Small bearings for Rack Plating
- ✧ To → Large landing gear shafts
- ✧ Tank capability 28"W x 72"L x 43"D

Anoplate Solutions

Anoplate has provided quality metal finishing services to industry since 1960. As a partner in your design process, we understand the important aspect of surface engineering as it relates to: corrosion resistance, wear resistance, friction reduction, light reflection, joinability, aesthetics and surface preparation. Whether you have routine plating or complex finishing requirements, our staff can help devise a customized surface engineering solution suited to your particular application.

Our finishes include:

- Anodizing
- Black Chrome
- Black Nickel
- Black Oxide
- Cadmium
- Chromating
- Chrome
- Copper
- Dry Film Lubricants
- Electroless Nickel (EN)
- EN/PTFE Coatings
- Electropolishing
- Gold
- Hardcoat Anodizing
- Magnesium Treatments
- Nickel
- Passivating
- Phosphating
- Silver
- Tin
- Tin-Lead
- Titanium Anodizing
- Vacuum Impregnation
- Zinc
- Zinc-Iron
- Zinc-Nickel
